

# A POLLINATION ENHANCER FOR HONEYBEES IN FLOWERING CROPS

V001

250g

# APISBLOOM®

## DIRECTIONS FOR USE – USE ONLY AS DIRECTED

### GENERAL DIRECTIONS

APIS BLOOM® is for use on flowering crops pollinated by honeybees. APIS BLOOM® enhances pollination by honeybees by mimicking the communication system worker bees use to inform others that optimal nectar sources are available. APIS BLOOM® causes worker honeybees to increase their foraging activity. If APIS BLOOM® has been refrigerated and has hardened, let it sit at room temperature for 24 hours prior to application. PROPER APPLICATION TIMING IS CRITICAL TO THE PERFORMANCE OF APIS BLOOM®. Carefully monitor the crop for flower opening. Only apply APIS BLOOM® after flower opening has begun. For best results, start applying APIS BLOOM® as soon as flowers start to open. Reapply APIS BLOOM® every 4 weeks while crop is flowering. Consult your distributor for specific local recommendations regarding usage instructions

for APIS BLOOM®. Clean equipment with warm water and unscented detergent if needed. Product color may change over time. This is normal and will not affect product performance.

### APPLICATION INSTRUCTIONS

Wear gloves while handling and applying this product. Apply with caulking or dosing guns, specialized mechanical equipment, or other appropriate tools. Apply APIS BLOOM® as individual dollops in the upper third of the plant. Localized discoloration or plant damage may occur when APIS BLOOM® is applied directly to soft plant tissues, such as flowers, fruits, young branches, and leaves. APIS BLOOM® may also be applied to plant support structures or other surfaces at similar height. Distribute dollops evenly across the treatment area. APIS BLOOM® is a ready-to-use formulation. DO NOT dilute. DO NOT apply when crop is NOT flowering. DO NOT apply to wet surfaces. Product may wash off if applied less than 4h before a rain event.

### APPLICATION RATE

26.5 oz (750 g) per acre in doses of 3g.

### STORAGE

Store product sealed in the original container, in a cool dry place, out of direct sunlight. For optimal shelf life, do not exceed 75°F (25°C). Do not freeze.

### WARRANTY NOTICE

The Manufacturer gives as its only guarantee that the product complies with the chemical and physical description on the label and is suitable for the indicated purposes, when used strictly in accordance with the instructions and under the conditions recommended for the product on this label and/or in the product brochure.

### ALLERGY NOTICE

People who are allergic to bees should avoid contact with this product, please be sure to clean up any traces of the product after use.
